

Client Profile

Carillion plc is a British multinational facilities management and construction services company. It is listed on the London Stock Exchange and is a constituent of the FTSE 250 Index.

Main Contractor

Carillion's joint ventures in the Middle East make them a regional leader in construction services and integrated solutions for buildings and infrastructure.

Background

Carillion has decades of experience in the Middle East beginning from the mid-1950s under the banner of George Wimpey & Co. Ltd, then having formed our first joint venture in the 1970s. Today Carillion's joint ventures are delivering some of the region's most prestigious buildings and infrastructure projects. Carillion are active in Abu Dhabi, Oman, Dubai, Qatar and Egypt.

"RedSky have worked with us to give us the best method of rolling out a new company quickly. This template set up saves us time and money by giving us the flexibility to implement a new Financial & Contract Management system under our own control. We do not have the overhead of building new company structures every time we commission a new JV. Summit can be configured to operate in a hosted environment in our own Infrastructure framework, or we can install locally depending upon the individual requirements of that JV."

Peter Walker - IT Director

Why Redsky IT?

Carillion has been a long standing customer of RedSky IT for many years, and, as the company has developed, the need for adding functionality and extending the use of contract management software across the businesses and Joint Ventures has also grown.

The Al Futtaim Carillion (AFC) business based in Dubai is the oldest established JV in the region and is using the RedSky IT Mentor solution to process financial and contract management data.

"The Summit solution has all the contract management reports configured the way we want them which allows our contract managers to access the data in a format they will be familiar with. Should we need to, the flexibility of Summit allows us to modify the information formats as local requirements dictate."

Teresa Gibbs - IS Manager

As Carillion are constantly adding new Joint Venture businesses across the MENA region each JV requires its own distinct management software package. RedSky IT has worked with Carillion to develop a template package using the Summit software application modules of Finance, Contract Costing, Subcontractor Management, Procurement & Stock / Inventory control. Therefore, as each new company is set up, Carillion can drop Summit into that business for immediate use. The template structure has been developed with RedSky and Carillion staff so that Carillion staff can control and implement the solution with RedSky acting in a supporting role where required.

Summit is now in use across a number of Carillion MENA JV sites in UAE, Egypt, Oman, Qatar and Saudi Arabia.

RedSky IT is a market leader within Construction, providing IT solutions to over 1300 companies including 40% of the top 100 contractors, 14 of the top 50 AEC consultants and many hundreds of small and medium sized businesses. With over 30 years' experience, we offer a complete portfolio of software solutions to help construction, contracting, house building and professional services firms manage their operations.
