15.45 Informato – Unlocking Business Knowledge

Managing both structured and unstructured content in your professional services firm is key to effective knowledge management. Informato has been developed to offer a framework to create, locate, manage and disseminate business knowledge to any user within a business.

- Opens up access to back office systems (such as Progression AEC) offering enquiries and reports to any user
- Gives staff access to any relevant document, cost report, image for any given project or area
- Enhances sharing of knowledge and information in an easy to use web browser format
- Powerful search tools to locate content and knowledge wherever it is stored
- User friendly publishing tools to create web content for intranets, extranets and your internet site
